

Call "811" Before Digging

MISS Dig wants everyone to know that April is Safe Digging Month!!!

Anyone performing any type of underground work should call "811" before digging. This is a free service.

This will allow all utility companies to visit the area where you intend to dig and mark out any underground utilities to avoid you damaging the lines or harming yourself or the public while you are working.

Please contact the MISS Dig website at www.missdig.org with any questions. And please remember, "Damage Prevention is a Shared Responsibility".
